<p>Please refer to "RESULT.md" file for the final validation results. The "README.md" file has the complete training logs, but since the log is huge almost around 500 epochs, github is not displaying the complete log list. Hence the last logs and final result is shown separately again in "RESULT.md" file. Also somehow Colab did not save the outputs from each cell.</p> <p>For reference below is the final result:</p> <p>Validation Results</p> <p>gender_output_accuracy : 0.8999999761581421  image_quality_output_accuracy : 0.5739583373069763  age_output_accuracy : 0.4333333373069763  weight_output_accuracy : 0.6479166746139526  bag_output_accuracy : 0.6505208611488342  footwear_output_accuracy : 0.6802083253860474  pose_output_accuracy : 0.8432291746139526  emotion_output_accuracy : 0.7208333611488342</p> <p>Your final score more than the cutoff of 0.2. Congratulations! You have qualified for the next round. YOU ARE ALSO IN TOP 10 SCORERS! Your class scores were:</p> <p>gender image age weight bag footwear pose emotion Code Score Final Score  0.97 0.95 0.94 0.97 0.93 0.96 0.94 0.86 0.86 0.78</p>
